

Project Description

In this project, you will work in groups of two or three to create a short video that highlights one of the Sustainable Development Goals (SDGs). The goal of this assignment is to inspire others to take action towards achieving them.

Detailed Instructions

Step 1: Group Formation

- Form groups of 2-3 students. Each group will focus on one SDG.

Step 2: Choose Your SDG

- Select one of the 17 Sustainable Development Goals. If you can't decide, take the following quiz: [CREATE YOUR WORLDS TO DO LIST - The Global Goals](#) or look for inspiration [SDG Videos - SDG \(de\) \(sdg-education.net\)](#).

Step 3: Research and Planning

- **Research:** Gather information about your chosen SDG to understand its objectives, challenges, and relevance in your local community and globally. Look for statistics, case studies, and examples of initiatives that align with this goal.
- **Identify Key Messages:** Decide on the key messages you want to convey in your video. What do you want your audience to learn or do after watching it?
- **Scriptwriting:** Write a script that includes an introduction, main content, and a conclusion. Make sure to include a call to action encouraging viewers to engage with the SDG.

Step 4: Video Production

- **Storyboard:** Create a storyboard to plan the visuals and scenes for your video. This will help you organize your ideas and ensure a smooth flow.
- **Filming:** Use a smartphone or camera to film your video. If there is enough time, be creative with your shots and consider using different locations that relate to your SDG.
- **Editing:** Use video editing software (such as iMovie, Windows Movie Maker, or online tools like Canva or WeVideo) to edit your footage. Add text, images, and background music to enhance your video.
